Call or text 979-777-0429

5748 State Highway 22, Hillsboro TX  
254-266-7501

## ONE PASS FOR PERFECT GRASS

**BENEFITS**

- Saves time and money with one pass
- On average you can expect 45 days of residual control
- Nearly eliminates the risk of physical drift
- Fewer weather delays when compared to spraying
- No spray equipment necessary

**REQUIREMENTS**

- Minimum of 200 pounds of fertilizer per acre (Final rate dependent on soil type)
- Choose one of three herbicide options
  - Chaparral - 3 oz/ac
  - DuraCor - 20 oz/ac
  - GrazonNext HL - 2 pints/ac
- Dyed to indicate treatment

**RESULTS**

- This effective technique is for hay ground and pastures. Compared to spraying, efficacy is slightly less because we are depending solely on soil activity for control. For example, if you are receiving 100% results from spraying, you can expect 75-80% control with treated fertilizer.

**Chaparral™**  
HERBICIDE

**DuraCor™**  
HERBICIDE

**GrazonNext® HL**  
HERBICIDE

**Range & Pasture**

For a tailored weed control and soil fertility program, call the Producers Agronomy department.

Call Producers for more information!  
979-778-2864

## From The Ground Up

From The Ground Up educates our friends and neighbors in the Brazos Valley about agriculture and its impact on their everyday lives. Be sure to watch our weekly televised segment at approximately 6:15 am on Thursday or during the Saturday 6 o'clock evening news on KBTX-TV 3, Bryan-College Station's CBS affiliate.

A new generation of agricultural leaders are continuously building on their experiences. Rudder High senior, Charli Josey, talks about her experiences on this week's From The Ground Up.
