AQUATIC VEGETATION MANAGEMENT IN FARM PONDS

Saturday, April 30th @ 10am

**Brittany Chesser, Aquatic Vegetation
Management Program Specialist.**

Texas A&M AgriLife Extension

Bring your aquatic plants for identification! But keep them hydrated in a pond water filled container with a lid!

1800 N Texas Avenue, Bryan TX 77803

(979) 778-6000

Aquatic Vegetation Control

As the weather continues to warm up, keep an eye out for aquatic plant life in your ponds and other aquatic areas. While some aquatic vegetation is beneficial to the environment, it can quickly get out of hand and take over your pond. There are a few different control methods that will help keep vegetation in your pond at the appropriate level. Producers offers a wide variety of products to treat your pond, giving a clean and clear view for your livestock and fishing partner.

For more information on control methods and weed identification, join of tomorrow at 10am for our Aquatic Vegetation Management class with Texas AgriLife Program Specialist, Brittany Chesser.

****1 IPM CEU credit will be offered!****

Date: Saturday, April 30th

Time: 10am

Location: Producers Cooperative Association, 1800 N Texas Avenue, Bryan TX

Spring Growing Season

The 2022 spring growing season is underway and the Producers Agronomy Team is here to support all of your range and pasture needs! From weed identification to soil sampling, our team can help. Custom application services include dry fertilizer, impregnated fertilizer, spray treatments and pelletized lime for seasonal pH adjustments. Killebrews, tenders and drag spreaders are also available for your convenience.

Call the Producers Agronomy Team today for expert recommendations and schedule your next application service. (979) 778-6000

HOW IT WORKS:

Purina® EquiTub® with ClariFly®

A Tub to Combat Flies & Gastric Discomfort for Horses

Prepare your barns and horses for the upcoming fly season with the Purina EquiTub with ClariFly.

Here's how it works:

1. Place the tub in the paddock or pasture where horses are turned out.
2. Horses consume the tub containing the ClariFly larvicide, which passes into their manure. They also get essential nutrients typically missing in forage and gastric support from Outlast supplement.
3. ClariFly in the manure prevents larvae from developing into adult flies, stopping the life cycle in its tracks.

Stop in or give us a call to get the buzz on fly control products for all of your equine friends!

From The Ground Up

From The Ground Up educates our friends and neighbors in the Brazos Valley about agriculture and its impact on their everyday lives. Be sure to watch our weekly televised segment at approximately 6:15 am on Thursday or during the Saturday 6 o'clock evening news on KBTX-TV 3, Bryan-College Station's CBS affiliate.

Large companies are looking to partner with agriculture to become "carbon neutral." Agricultural Law Specialist, Tiffany Lashment J.D., and Professor & Extension Economist, Dr. Joe Outlaw, has more on this week's From The Ground Up.
