Summer is fast approaching with hot, dry months to come, resulting in the depletion of forage quality and limiting nutrient availability for your herd. Purina Rangeland 30-13 tubs offer a convenient solution in supplementing those lost nutrients to improve overall forage consumption and utilization. Offering 30% protein, it is an ideal supplement for cattle grazing on low quality pastures and supports overall immune function and herd health! For questions on protein supplementation options, contact the Producers Feed Division at 979-778-2864.
