

## FEEDING MANAGEMENT TIPS:

- Always provide clean, fresh water
- When changing rations, allow ample time for the animal to adjust
- Each bird should have at least 2-4 square feet of space
- Dump old feed each day or save it for cull chickens

We also have a full feeding and information packet on housing, heating, lighting, and many more helpful tips for all your show bird needs.

Feeding Champions Since 1943

## RECOMMENDED SUPPLEMENTS:

**Citra-Lite:** vitamin and electrolyte supplement; add to water to stimulate feed and water intake

**QuickStart:** top dress to increase feed intake

**R&D Broiler and Turkey Supplement:** top dress to help with muscle development

### TURKEY STARTER CRUMBLE

The first step in the Show Poultry feeding program. A 30% protein, 6% fat, and 1.93% added lysine, an essential amino acid for muscle development. We recommend this feed from 0-12 days; 3-4 bags will feed 100 birds

### SHOW BROILER STARTER PELLET

The third step in the Show Poultry feeding program. A 26% protein, 6% fat, and 1.5% added lysine. Contains extra pro-biotics and essential oils to improve immune function. We recommend this feed from 12-16 days; 4 bags will feed 100 birds

### TURKEY STARTER PELLET

The second step in the Show Poultry feeding program. The same formula as the turkey starter crumble, but the pellets make it easier for older birds to pick up. We recommend this feed from 12-16 days; 4 bags will feed 100 birds

### SHOW BROILER FINISHER PELLET

The last step in the Show Poultry feeding program. A 21% protein, 6% fat, and 1.2% added lysine. Contains proprietary pro-biotics and essential oils to improve immune function. We recommend this feed from 24 days to end of show; 14-15 bags will feed 100 birds
