| Crude protein not less than | 20% |
| Crude fat not less than | 5.0% |
| Crude fiber | not more than 3.0% |

Feed Mazuri® Mini Pig Youth on a free-choice basis as creep feed from 7 days post-weaning until 8 weeks of age or older. Continue feeding free-choice if rapid growth is desired.

To regulate growth rate, after 8 weeks of age feed at a rate of 1.5 - 3.0% of current body weight. Do not underfeed. Measuring food by weight is recommended; see Feeding Rate table.

The level of feed intake depends on many factors some of which include: environmental temperature, other foods available, level of activity and social hierarchy.

Change to Mazuri® Active Adult diet as desired to regulate growth rate at 16 weeks of age or older.

For gestating or lactating females, feed a mixture of 50% Mazuri® Mini Pig Active Adult and 50% Mazuri® Mini Pig Youth for increased energy.

For higher energy needs, as in the case of large litter size or multiple breedings, increase Mazuri® Mini Pig Youth to 60% of daily intake.

When using a self-feeder, make sure it is adjusted for minimize feed wastage.

Always provide animal with plenty of fresh, clean water.

Feeding rates available on the Product sheet.

Storage Conditions

For best results, store contents of open bag in container with sealing lids. Store in a cool (75°F or colder), dry (approximately 50% RH) location. Use within 1 year of bag manufacturing.
