## **DIRECTIONS**

Feed free choice but not to exceed 4lbs per head per day to cattle on fair and poor quality forage.

### **IMPORTANT!**

This product contains a readily available source of non-protein nitrogen and must be fed only according to directions

1. Consumption of Forage Balancer Block 3HL normally required to maintain cow condition will be 1.5 to 2.5 lbs per head per day on fair quality. The lower feeding rate within each forage category is normally recommended for dry cows whereas the higher feeding rates are for lactation cows. Normally the maximum intake of this block is 4 lbs per head per day. If consumption is lower or higher than required, check with your Purina dealer for optional product recommendations.
2. Provide a source of fresh water at all times.

**DO NOT FEED TO SHEEP OR GOATS**
