## FEEDING DIRECTIONS

Feed at a rate of 1.0 to 2.5% of animal's bodyweight per day, depending on the desired rate of weight gain and degree of finish. Always provide adequate amounts of good forage (hay or pasture) and plenty of fresh, clean water.

CAUTION: allowing unrestricted access to this feed without providing adequate amounts of forage (hay or pasture) or feeding a large volume once a day could result in the development of ruminal acidosis, resulting in reduced animal performance or even death.
