FEEDING DIRECTIONS

LACTATING DAIRY CATTLE: Designed to be fed along with a high quality forage (hay or pasture), plenty of fresh, clean water, and a free-choice mineral product such as Producers 12-12 Mineral. The amount of Lactation Pellets to feed will depend upon the stage and amount of production desired.

LACTATING GOATS: The proper amount to feed will depend upon the size of animal, level of milk production and quality of forage being consumed. From 4 to 6 pounds of Lactation Pellets per head daily, along with good quality forage should be adequate for goats with average milking ability.

Manufactured by
PRODUCERS COOPERATIVE ASSOCIATION
Bryan, Texas 77806

Net Weight 50 lbs. (22.68 kg) or Bulk
