Salt, % (NaCl)	(max)	0.65
Selenium, ppm (Se)	(min)	0.30 ppm
Zinc, ppm (Zn)	(min)	500 ppm

**Medicated for pigs weighing 25 lbs. and up.** For the control of swine dysentery associated with *Brachyspira* (formerly *Serpulina* or *Treponema*) hydrosentariae susceptible to tiamulin.

**Active Drug Ingredient:** Tiamulin (as hydrogen fumarate) 35g/ton.

## FEEDING DIRECTIONS

Offer Honor® Show Chow® SHOWPIG 509 DEN35 to pigs weighing 25 to 100 lbs in bodyweight.

### Warning:

Withdraw medicated feed 2 days before slaughter following use at 35g/ton. Protect from excessive temperatures (Temperatures that exceed 40° Celsius or 104° Fahrenheit). Do not store at warm temperatures up to 104° Fahrenheit (40° Celsius) for more than 7 days.

### Caution:

Use as the only source of tiamulin. For swine use only. The effects of tiamulin on swine reproductive performance, pregnancy and lactation have not been determined. Swine being treated with tiamulin should not have access to feeds containing polyether ionophores (e.g., lasalocid, monensin, narasin, salinomycin and semduramicin) as adverse reactions may occur. If signs of toxicity occur, discontinue use of medicated feed.

DO NOT FEED TO SHEEP DUE TO HIGH LEVELS OF COPPER.

### Special Considerations:

Store in a dry, well-ventilated area protected from rodents and insects. Do not feed moldy or insect-infested feed to animals as it may cause illness, performance loss or death. USE ONLY AS DIRECTED.

## THE WINNING PHILOSOPHY

Efficient production requires a thorough understanding and application of the fundamental principles of good husbandry and sanitation. The Purina® Winning Philosophy program will help you step into the spotlight.

- 1. GOOD BREEDING:** Practice a sound genetic program of selection and culling. Visit a professional breeder for more information. Know the feeling when you have that perfect animal that has the best potential to win.
- 2. GOOD FEEDING:** Proper nutrition for different needs and lifestyles starts with Honor® Show Chow® products. Feed at regular times at least two times daily, with three daily feedings preferred. You can't become a Grand Champion without the best nutrition.
- 3. SOUND MANAGEMENT:** A clean environment minimizes stress and aims to improve average daily gains. Clean stalls, remove debris and provide fresh water daily. The daily attention to detail is the difference between a Grand Champion and lower placement.
- 4. PREVENTIVE HEALTH:** Establish an effective health program with your local veterinarian. A sick animal never makes it to the top.

These are the building blocks of the Honor® Show Chow® program and the keys to successful production. Practical application of these basic principles will not only support your animal's growth and development, but also increase its potential of winning on the show circuit.

POWER IN PERFORMANCE

We know the best way to help you realize your dreams starts by employing a Winning Philosophy:

# WINNING PHILOSOPHY

BETTER BREEDING

- Genetic Potential
