**PURINA WIND & RAIN® Hi-Mag 4 COMPLETE**

**0040314**

**What It Is...**

A comprehensive line of beef cattle minerals designed to correct the mineral deficiencies of the available forage in a palatable, weather-resistant, loose formula. Wind and Rain® cattle minerals' large particle size and special formulation keeps the mineral from blowing out of the feeder. And, since the moisture from rain or snow passes easily through the mineral, cattle continue to consume it even after it has been wet. This reduces waste and, as a result, makes Wind and Rain® more economical to feed than conventional loose minerals.

Features	Benefits
Balanced mineral nutrition	Wind and Rain® minerals contain the proper balance and ratios of all 14 essential cattle minerals. Matching the correct product for the cattleman's available forage assures cattle receive the mineral nutrition they need for health, growth and reproduction.
Consistent Consumption	Research tested and field proven, Wind and Rain® minerals are formulated with high quality, coarse textured ingredients that helps assure palatability. That means cattle will consume what they need, when they need it.
Provides optimum levels of trace minerals at a 4 ounce consumption rate	Aids in disease prevention, improves fertility, and promotes fetal development.
Contains 10% magnesium	Reduces potential for death losses from grass tetany.
