

# Purina® Floating Catfish 32

A floating fish feed that is comprised of high-quality ingredients and nutrient levels designed to maximize efficient production of all types of catfish. When combined with proper management practices, Purina Catfish 32 is formulated to support the growth of large, healthy catfish.

## Features and Benefits

### 32% high-quality protein

Balanced amino acids support lean growth

### High energy content

Encourages rapid and efficient growth

### Stabilized vitamin C

Supports optimal health

## Guaranteed Analysis

## Feeding Directions

### Feeding Directions:

Feed Purina® Catfish 32 floating fish feed to pond catfish that are at least 6 inches in size at stocking rates of less than 4,000 fish per acre. Ensure that adequate oxygen is available to the fish and follow the recommendations for various water temperatures.

Water Temperature Amount to feed daily Frequency of feeding

65-75° F. 2-3% of body weight Daily 6 days/wk.

75-85° F. 3-5% of body weight Daily 6-7 days/wk.

85-90° F. 2-3% of body weight Daily 5-6 days/wk.

### Caution:

1. Always follow label directions.
2. Store in a dry, well-ventilated area protected from rodents and insects.
3. Do not feed moldy or insect-infested feed to animals as it may cause illness or death.
4. Please consult the tag sewn onto the bag for complete feeding instructions.

### Management Practices:

1. Poor water quality is the most common cause of fish loss.
2. Avoid overstocking ponds; exceeding the biomass capacity of a pond may result in fish loss.
3. Avoid overfeeding; excessive nutrient load will deplete water oxygen.
4. Reduce feeding frequency to not more than five days per week when water temperature reaches 85° F. Drastically reduce feeding rates and reduce frequency of feeding to three days per week at temperatures above 95° F.
5. Keep ponds adequately aerated.
6. If feed is not completely eaten within 20 minutes, reduce the amount that is offered.
7. Feed in late afternoon/early evening, when dissolved oxygen concentration is highest.
