## PREMIUM RABBIT PELLETT

FOR ALL CLASSES OF RABBITS

### GUARANTEED ANALYSIS

Crude Protein	(Min)	17.00 %	Phosphorus	(Min)	0.70 %
Crude Fat	(Min)	3.50 %	Salt	(Min)	0.55 %
Crude Fiber	(Min)	14.00 %	Salt	(Max)	0.75 %
Crude Fiber	(Max)	18.50 %	Selenium	(Min)	0.30 PPM
Calcium	(Min)	1.00 %	Vitamin A	(Min)	4,500.00 IU/LB
Calcium	(Max)	1.40 %			

### INGREDIENTS

Forage Products, Soybean Meal, Roughage Products (20%), Processed Grain Byproducts, Cottonseed Meal, Molasses Products, Mono and Dicalcium Phosphate, Ground Limestone, Yeast Culture, Salt, Choline Chloride, Calcium Carbonate, Vitamin E Supplement, Niacin Supplement, Mineral Oil, Calcium Pantothenate, Biotin, Vitamin A Supplement, Vitamin D3 Supplement, Riboflavin Supplement, Menadione Sodium Bisulfite Complex, Pyridoxine Hydrochloride, Thiamine Mononitrate, Vitamin B12 Supplement, Folic Acid, Brewers Dried Yeast, Dried Saccharomyces Cerevisiae Fermentation Solubles, Magnesium Oxide, Ferrous Sulfate, Zinc Sulfate, Zinc Oxide, Manganous Oxide, Copper Sulfate, Copper Chloride, Sodium Selenite and Ethylenediamine Dihydrochloride.

### FEEDING DIRECTIONS

Standard Rabbit Feed is recommended for full-feeding to does during lactation and to growing rabbits. The feed may also be used as a maintenance and gestation feed if hand feeding and feed restriction is practiced, or if supplemental hay or other low energy forage is provided to prevent breeders from getting too fat.

Feed requirements for rabbits will vary depending on their body weight, environmental temperatures, type of housing, etc. Adult non-lactating rabbits should consume approximately 1/2 ounce of feed/lb of bodyweight, while lactating does will consume 1 to 3 ounces/lb of bodyweight. Fryers will consume an average of 4 ounces per day during the period from weaning to market.

Adult rabbits being limit-fed for maintenance or during gestation may be fed either once or twice per day. Feed adult non-lactating rabbits the amount they will clean up in approximately one hour (30 minutes if feeding twice daily) and adjust the amount fed to maintain condition.

Fresh water must be available at all times for optimum performance of rabbits.
