

Formula Number – **32N1**

Form of Feed: Textured

(For Ruminants Only)
FOR CATTLE 400 LBS TO SHOW
CAUTION: FEED AS DIRECTED

1. If show cattle have not been receiving a high-energy diet, begin feeding 1% of their bodyweight weight per day with free choice grass hay.
2. Increase feed slowly over a 14-day period to 2 to 2.5% of bodyweight per day along with free choice grass hay.
3. Always allow free access to plenty of clean, fresh water at all times.
4. For example, if calves weigh 600 lbs., 1% of bodyweight would be 6 lbs. per day ($600 \times 0.01 = 6$).

Available Options:

Product No.	Package	Size Diameter
3004554-506	Bag 50#	5/32-11/64
3004554-501	Bulk	

Product Features:

Product Benefits:

A Uniquely-Formulated Versatile Ration	<ul style="list-style-type: none">Offers flexibility from start to finish in your feeding program.With grass hay, can be fed as a complete ration to grow and develop show cattleCan be blended with grain to achieve the desired rate of gain while maintaining a well-balanced ration.
Proprietary Blend of Ingredients	Helps optimize palatability.
Steam Flaked Corn	High-energy (calories) formula to help produce early bloom.
Cottonseed Hulls	A very palatable roughage source encouraging consistent intake.
Tasco®	Research has shown that TASCO helps keep animals on feed during heat stress.
Diamond V®	<ul style="list-style-type: none">A true, fully fermented yeast culture developed specifically for optimum animal nutrition.Research proven, Diamond V® has a unique ability to enhance ration digestibility, palatability and intake by delivering a rich, all-natural nutrient source to the animal's digestive bacteria.
Includes Availa®	<ul style="list-style-type: none">Balanced combination of zinc, manganese, copper and cobalt.Provides critical high-available minerals that help support immune response which is critical for healthy traveling show cattle.Helps maximize muscle development allowing cattle to reach their full potential.
PuriFerm™	A uniquely formulated fungal enzyme ingredient containing both Aspergillus oryzae and Aspergillus niger. Fungal enzymes help in the digestibility of fibrous feedstuffs, thereby helping support growth performance.
Flexible use with High Octane® Supplements	Designed to be used with High Octane® Supplements to help maintain ideal body condition or support growth rate use High Octane® Power Fuel®, to help support muscling use High Octane® Champion Drive™, to help support muscling and leanness use High Octane® Fitter 35®, or to help gain a fuller appearance use High Octane® Depth Charge®. `
Research proven	Feed it with total confidence – backed by Purina Animal Nutrition's legendary tradition of fundamental and applied research.

IMPORTANT:

This product is to be fed only to the animal species as directed on this label. Follow these management practices:

1.

When making a ration change, allow 7-10 days for animals to adjust to the new ration.
2.

Provide a source of fresh, clean water at all times.
3.

Do not allow fine material to accumulate in feeders.
4.

Provide adequate, well-protected and well-managed bunk space for each animal to prevent feed from becoming wet and moldy.
5.

When fed from a self-feeder, adjust feeder to minimize quantity of feed accumulating in trough.
6.

Cattle should be vaccinated against enterotoxemia.
7.

Consult your veterinarian for the recommended health program for your local area. This includes internal and external parasite control.
8.

Provide plain salt and Purina® Wind & Rain® All Season mineral free choice.

In groups of cattle, there are certain animals that experience bloat or other digestive disturbances and, consequently, are poor performers. In addition, excess feed consumption, severe weather changes resulting in erratic feed consumption and poorly-managed feeding practices can increase the incidence of bloat in all cattle. If bloating does occur, the above management practices should be reviewed.

CAUTION:

Store in a dry, well-ventilated area protected from rodents and insects.
Do not feed moldy or insect- infested feed to animals as it may cause illness, performance loss or death.

KEY POINTS:

Efficient production requires a thorough understanding and application of the fundamental principles of good husbandry and sanitation. The Purina Winning Philosophy program will help you step into the spotlight.

1.

GOOD BREEDING: Practice a sound genetic program of selection and culling. Visit a professional breeder for more information. Know the feeling when you have that perfect animal that has the best potential to win.
2.

GOOD FEEDING: Proper nutrition for different needs and lifestyles starts with Honor® Show products. Feed at regular times at least two times daily, with three daily feedings preferred. You can't become a Grand Champion without the best nutrition.
3.

SOUND MANAGEMENT: A clean environment minimizes stress and aims to improve average daily gains. Clean stalls, remove debris and provide fresh water daily. The daily attention to detail is the difference between a Grand Champion and lower placement.
4.

PREVENTIVE HEALTH: Establish an effective health program with your local veterinarian. A sick animal never makes it to the top.

These are the building blocks of the Honor® Show program and the keys to successful production. Practical application of these basic principles will not only support your animal's growth and development, but also increase its potential of winning on the show circuit.
