* This is the recommended minimum amount of hay to be fed. If feeding more hay, you may reduce the feeding rate of Omolene® 200 Horse Feed to maintain appropriate body condition.

** To meet nutrient requirements, do not feed less than 0.35 lbs. per 100 lbs. of body weight per day for mature horses (3.5 lbs. per 1000-lb. horse), 0.50 lbs. per 100 lbs. for lactating mares (5 lbs. per 1000-lb. horse) or 0.75 lbs. per 100 lbs. of body weight per day for yearlings (3.75 lbs. per 500-lb. BW). If your horse gains too much weight at that minimum feeding rate, transition to Purina® Enrich Plus® Ration Balancing feed.

***Feeding rates of Omolene® 200 Horse Feed and forage may be adjusted or feed may be top-dressed with Purina® Amplify® High-Fat Supplement for additional calories. Hard-working horses may also benefit from supplementation with Purina® Supersport® Amino Acid Supplement.

**** Use the lower feeding rate for moderate growth rate and the higher feeding rate to support more rapid growth rate.
