# WIND & RAIN® STORM® ALL SEASON 12 COMPLETE

**Specie:** Beef

**Type of Feed:** Mineral

**Form of Feed:** Granules

## General Description:

Beef cattle minerals designed to correct mineral deficiencies of the available forage in a highly, palatable, weather-resistant, granular form. Wind and Rain® Storm® cattle minerals' large particle size and special formulation keeps the mineral from absorbing water and blowing out of the feeder. The Storm® technology provides the ultimate in weather resistance to reduce waste and makes Wind and Rain® Storm® Formula more economical to feed than conventional loose minerals.

<b>Product Features:</b>	<b>Product Benefits:</b>
Balanced mineral nutrition	Contains the proper balance and ratios of all 14 essential cattle minerals  Matching the correct product for the cattleman’s available forage assures cattle receive the mineral nutrition they need for health, growth and reproduction
Exclusive STORM® formulation	STORM® formulation nearly eliminates water retention and clumping or bricking; cattle will consume the mineral even after it’s been wet  Though it resists moisture, Purina research reveals that it does not prevent digestion, resulting in less waste
Large particle size ingredients and rain protection	Resistant to wind losses and rain damage

**IMPORTANT:**

This product is to be fed only to the animal species as directed on this label. Follow these management practices:

1. Cattle receiving phosphorus deficient diets may over-consume this product when it is first offered.
2. Place the mineral feeder near the water supply or in the animals’ loafing area.
3. Put out fresh mineral at least once per week.
4. Feeding free choice salt is not required with this mineral.
5. Provide fresh, clean water near the feeding area.

**USAGE TIPS:**

Feed this product free choice to cattle receiving rations composed largely of grass hay or to cattle grazing range pastures. Optimum intake is 4 ounces per head per day. Cattle receiving phosphorus deficient diets may over-consume this product when it is first offered.

Free choice feeding is recommended with this mineral.

**KEY POINTS:**

- Addresses mineral deficiencies of the available forage in a palatable, large particle size formula that keeps mineral from absorbing water and blowing out of the feeder
- STORM® formulation eliminated water retention and clumping or bricking of mineral, allowing cattle to consume the mineral even after it’s been wet
